SUPERVISORY PATENT EXAMINER

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues claim 1 reads that the server 'receives' the characterization data in response to a user request where the prior art, Fields (6,581,109), 'retrieves' the characterization data in response to a request. However, implicitly the invention of Fields receives the characterization data regardless if the system initially retrieves the data. As with Applicants invention, a retrieval means is needed in order for the actual system that is requesting the characterization data to receive such data.

PATENT EXAMINER Lichelle X fray.
